

DIGITAL PRINT DATA EXCHANGE

PROGRAMS

- Adobe InDesign CC
- Adobe Illustrator CC

FILE FORMATS

- .pdf
- .indd (packed)
- .ai

DATA TRANSMISSION

- Mail: office@fahnen-gaertner.com
- WEB: upload.fahnen-gaertner.com
- FTP: Host: [ftp.fahnen-gaertner.com](ftp://ftp.fahnen-gaertner.com)
BN: ftp@fahnen-gaertner.com
PW: fahnen

PREFERRED DATA FORMAT

We require a printable PDF for finished data.

For all subjects that are to be assembled or processed at FAHNENGÄRTNER, we require "open data" to enable changes to be made.

DATA PARAMETERS

Data should be prepared and processed in a scale of 1:10 with an image resolution of at least 1200 dpi and the import and export profile "CMYK Coated Fogra 39" and sent or uploaded to FAHNENGÄRTNER. Please convert all fonts to paths!

IMAGE FORMATS

The images should preferably be placed in TIF format (CMYK Coated Fogra 39) with LZW compression. The image data must be supplied with open data. We also accept JPEG and EPS format.

COLOUR INFORMATION

We always print "from data" in CMYK mode (non-binding). If you require special colours, we use exclusively the "Pantone Solid Coated" colour fan (best possible). Please colour the data in the vector/path regions with the required Pantone-C density value (Solid Coated).

Note: Density value colours in image data cannot be recognised by the RIP (raster image processor); they automatically convert the RIP to a CMYK value.

BLEEDS AND SEAM ALLOWANCES

A bleed of 1 mm (scale 1:10) is only required with digital print products with cut margins. We do not require bleeds or seam allowances for rectangular or quadratic shapes. Special shapes, such as trend banners, frames, sound insulation elements, stapled pictures, etc. can be found in our graphics templates, which you can obtain from our representative or on line for download at:

<https://www.fahnen-gaertner.com/de/service-beratung/downloads-und-blaetterkataloge.html#vorlagen>

POSSIBLE ADDITIONAL COSTS

Unusable data will be converted at a rate of EUR 75.- per hour net. We will of course inform you first!

SERVICE AND ASSISTANCE WITH GRAPHIC DESIGN

Our graphic designers will be pleased to assist you with your designs. Existing designs can be modified to your requirements or completely redesigned. We charge EUR 75.- per hour only for the time actually required for the specific service.

INFORMATION ON FTP ACCESS

Please note that this is a public FTP access and is fully available for anyone. Please contact our sales team first if you wish to send sensitive data. Data can only be transferred with suitable FTP software such as Filezilla (PC) or Cyberduck (Mac).
